

Courses on NXP Power processors

ACSYS offers a large set of courses on NXP processors.

Each course details both hardware and software implementation of these processors.

Examples are provided to explain low level programming, which is needed to understand the boot program.

For on-site trainings, an additional day on Linux porting or Windows Embedded porting may be appended to the processor course.

Course	Duration	Availability
FCC1 e500mc implementation	3 jours	Renseignements
FCC2 e5500 implementation	5 jours	Renseignements
FCC3 P101X QorIQ	3 jours	Renseignements
FCC4 e6500 implementation	3 jours	Renseignements
